SUMMARY

Data-oriented Computer Science & AI undergraduate skilled in data visualization, exploratory data analysis, dashboard development, and frontend development. Experienced in transforming raw datasets into actionable insights using Python, Pandas, Matplotlib, and Seaborn while building clean and user-focused digital experiences.

EDUCATION

B.Tech – Computer Science and Artificial Intelligence (2024–28)

Newton School of Technology, Rishihood University

TECHNICAL SKILLS

- Languages: Python, SQL, JavaScript, C++, HTML, CSS
- Libraries: Pandas, NumPy, Matplotlib, Seaborn
- Visualization: Data Visualization, Dashboarding, EDA
- Development: React.js, Frontend Development, Git, GitHub
- Tools: Jupyter Notebook, VS Code, Figma

PROJECTS

Used Cars Market Analysis ([GitHub](#))

- Performed exploratory data analysis on used car datasets to identify pricing trends and resale factors.
- Built visualizations for mileage, fuel type, transmission, and brand-wise analysis.
- Cleaned and processed datasets using Pandas and NumPy.
- Derived business insights using Matplotlib and Seaborn.

DVA Capstone Project ([GitHub](#))

- Developed analytical dashboards and visualizations using real-world datasets.
- Conducted EDA and trend analysis to extract actionable insights.
- Collaborated using GitHub workflows and structured project organization.

EXPERIENCE

Frontend Developer – Nirvaan Global IT

- Contributed to the development of the company's ERP website and frontend interfaces.
- Worked on responsive UI components and improved user experience across web pages.
- Collaborated with the development team on website design and implementation.

ACHIEVEMENTS

- Knight on Leetcode (1858 rating)
- Solved 200+ LeetCode problems
- Team Lead – Smart India Hackathon (shortlisted)
